

November 2008

Our environmental and quality efforts are a natural and integrated part of our daily operations. We hold both ISO 9001 and ISO 14001 certification and are one of the few companies in the industry to comply with NORMPAC's stringent demands on food packaging.

## Emplus® – a new strong packaging alternative!

Emplus® is Emballator Lagan Plast's latest in-house-developed packaging solution for cookies and confectionaries with the focus on quality, handling and the environment. Emplus® provides several pluses, such as improved stacking of empties, better sealing, optimisation for mechanical handling, offset and in-mould labelling, just to mention a few.

Emplus® enhances your opportunities for improved and more distinct exposure of both brands and products in shops. With attractive, attention-grabbing, high quality printing of side and cover packaging, your prospects increase for added sales. And that's definitely a plus! Right? Don't hesitate to get in touch so that we can talk more about Emplus®.

Emplus® has a simple, clean and functional packaging design and is manufactured with the highest consideration to impact on climate and the environment.

## BioLatriin – as close to 100% eco-friendly as you can get!

BioBag International – a global leader in its sector that develops, manufactures and markets biodegradable compostable packaging in plastic – has begun collaboration with Emballator Lagan Plast. For quite some time, we've been producing the BioLatriin product, which is a patented and biodegradable portable toilet bin. BioLatriin simplifies the entire treatment and composting process for portable toilet systems for homes, summer cottages, etc. BioLatriin is manufactured in Mater-Bi – a raw material that is not gene manipulated and that complies with the European standard EN 13432 for biodegradable packaging.

Read more about biodegradable packaging in plastic at [www.biobag.no](http://www.biobag.no).
