

April 2008

Our aim is to supply the market's best complete packaging solutions, developed in collaboration with our customers.

By manufacturing our own moulds we are able to develop a new product in a very short time.

## ■ Post-production services – “product processing without limits”!

Ultrasonic welding, stamping, post-installation, labelling, packing and marking. We call it “product processing without limits”. Allow our expertise and commitment help to create the best end product for you.

Stamping holes...

Post installation of lids...

Stamping and perforation...

Ultrasonic welding with, for example, flexspout...

Labelling as you want it...

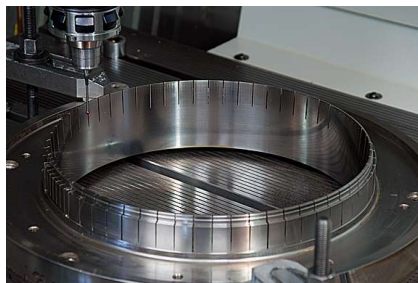

Marking, for example tactile marking...

## ■ Increased capacity for mould manufacture!

Emballator Lagan Plast increases the capacity for mould manufacturing by a further CNC controlled mill. It gives you as customer more security, delivery reliability, service and product quality.

– And if you get a stoppage in any of your production lines and need replacement parts fast, contact us! We have “saved the day” many times...
