### QUALITY POLICY

We shall through constant improvements in our processes, products, services and management systems have a quality that provides profitability and long-term survival.

This will be done through:

High customer satisfaction:

- High safety in delivery
- Right and even product quality
- High customer service
- Competitive prices

High productivity in form of:

- Short set-up times and lead times
- High capacity-use of machines
- High capacity-use of raw-materials

The managements task is to create:

- An approved and functional quality system
- Competent, engaged and motivated co-workers
- Qualitygoals that continuously are followed up and audited.

## MELLERUD PLAST

### ENVIRONMENTAL POLICY

Our business affects the environment by the use of finite resources and energy demanding processes. We only use those plastics (polyethylene and polypropylene) which have the least possible influence on the environment.

Emballator Mellerud Plasts environmental work includes that we shall:

- Improve the efficient use of plastic raw-material, energy and transports and also reduce the amount of waste and chemicals.
- Develop a personal responsibility among the co-workers through education and information to actively contribute in the company's environmental work.
- Fulfil the demands that environmental law's, authorities and other interest groups make.
- Prevent pollutions.
