TUBE – a new sports bottle accessoires Transforms our push-pull closure to a tube closure

TUBE is a completely new accessories for sports bottles. With TUBE you can choose if you want to use our traditional push-pull closure, or if you want to transform it to a tube closure. TUBE is easy to assemble and disassemble on the closure.

TUBE is manufactured in a exclusive silicon material to give optimal function and comfort when drinking.

Elderly models of tube closures are often without a working closing function, which can cause leakage. With TUBE assembled on our push-pull closure you can close the tube with the push-pull function.

TUBEs design also makes it easy to open the closure and drink through for example helmet bars and other sports protective equipment.

Read more about TUBE, our product range and our latest news on **www.sportsbottles.nu**.

You are also welcome to contact our sales dep. at +46 (0)530 44404 or mailbox@mellerud.emballator.se if you want samples or more information.

Emballator Mellerud Plast also manufactures bottles and cans for chemicals, food and pharmaceuticals. Read more at www.emballator.com.
