EMBOSS

A unique bottle with many opportunities

Our new water bottle EMBOSS can be both printed and embossed. Customer's own embossing makes the bottle unique and the opportunities to innovate and change the bottle are many.

EMBOSS holds 500 ml, is easy to grip and has a large printing area. The customer's unique embossing is done in the bottle's big grip. The large opening makes the bottle easy to clean.

Both bottles and closures are produced and printed on Emballator's plants in Sweden. Of course all materials in both bottle and closure are certified for food contact declaration.

Learn more about EMBOSS, our collection and our latest products on our website www.sportsbottles.nu.

You are also welcome to contact our sales department on +46 (0) 530 44404 or mailbox@mellerud.emballator.se if you would like samples or more information.
