

EasyOpen industrial lid solution

EASY TO OPEN AND UN CERTIFIED

Paint

Chemical

Hazardous goods require cans that can be subjected to almost anything and still stay intact. To ensure this is the safest can we have ever made, EasyOpen was put through several tests (shaking, drop, pressure, etc.) and other trials during development. The plastic seal ring is easily broken with a screwdriver and then all you have to do is open the lid.

Safe storage

Metal is relatively insensitive to temperature change. This guarantees that there is no deterioration in the quality of can contents.

Robust

EasyOpen was subjected to a great deal during its development. Long series of tests (shaking, drop, pressure, etc.) ensured that EasyOpen meets our stringent requirements in respect of robustness.

100% recyclable

EasyOpen is fully recyclable and easily sorted in separate material streams.

Internationally approved for air transport

EasyOpen meets the severe requirements of IATA in respect of air transport safety.

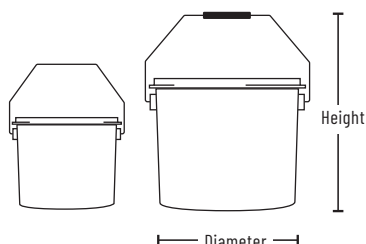

Fire resistant

Tests show that tin cans make no contribution to fire propagation.

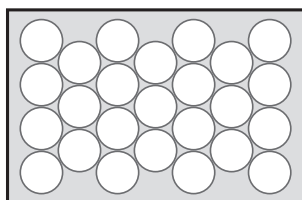

Ø180 and Ø285 Duraline™ pails with EasyOpen lid solution

The Duraline™ 180 is a durable and available as UN approved design. In addition, it only requires one pail to be kept on stock and the different lids can be used as needed – a flexible solution that saves room in your warehouse.

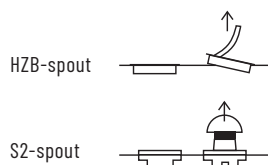

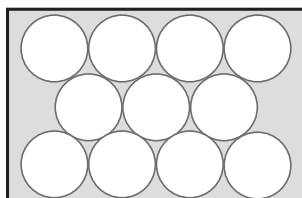

The conical design of the pails is logistically advantageous as empty packs are stacked inside each other resulting in higher quantities per pallet. The external is available in plain, white or decorated to customer's requests. The internal is available in plain or lacquered.

Pallet pattern Ø180, 25 pails/layer

Pallet pattern Ø285, 11 pails/layer

PAILS

Volume (L)	Height (mm)	Diameter (mm)	Pails/pallet
2,5	147	180	350
3	161	180	475
4	201	180	450
5	243	180	475
12	234	285	99
15	288	285	99
20	369	285	88
25	457	285	77

EASYOPEN LIDS

Description	Lids/pallet
EasyOpen™ 180 UN lid	672
EasyOpen™ 180 lid	672
EasyOpen™ 285 UN lid	216
EasyOpen™ 285 lid	672

ADDITIONAL LID OPTIONS

Description	Lids/pallet
Lug lid 180 UN	3240
Lug lid 180	1650
Lug lid 285 UN	918
Lug lid 285	918
Press lid for ring latch 180 UN	2880
Press lid for ring latch 180	3360
Ring latch lid 285 UN	1260
Ring latch lid 285	1620
Press lid 180	3360
Press lid 285	990

The lids are available with HZB or S2 spout

INTERNAL PROTECTIVE COATINGS

Designation	Number of layers	Lacquer	Area of use*
T	1	Gold	Food, Certain technical products
C	2	Gold +Pigmented	Water based paints, without rust protection inhibitors Not suitable for strong solvents
D/DA	2	Gold	Corrosive industrial coatings

* This is only a general indication of the appropriate areas of use. The internal coating lacquer should always be tested with the product for which the can is intended to be used.
