

## PURCHASING POLICY

Our suppliers are important partners and key success factors for our long-term development. It is of the utmost importance that our suppliers comply with the demands, needs and expectations we make of them. Our purchasing policy is the basis for our work with our suppliers and business partners.

Our essential requirements are that our suppliers;

- Comply with applicable laws and other government regulations
- Has established and applied policies for personnel, working environment and the environment
- Has an established and well-functional quality management system
- Has a professional and ethical approach

To ensure our and our partners continued competitiveness are the following key values priority during sourcing selection;

- Right and stable quality
- Competitive total cost
- High delivery performance
- High level of service

To ensure long-term development, our goals and strategies are;

- That through collaboration establish stable and long-term relationships with identified strategic suppliers, where we continuously develop products and services in mutual cooperation
- That our partners have a healthy and stable economy, an active continuous improvement process and development of personnel, health and safety, processes, product, quality and reducing the environmental impact
- That on selected products and areas to work with two or more suppliers to ensure availability and competitiveness
- That through cooperation with the other Emballator companies create synergies regarding competitiveness, quality, delivery, service, innovation and development

The above fundamentals will lead to our and our suppliers' long-term development, strengthening Emballator Møllerud's brand and ensure we meet our customers and the market's current and future requirements, needs and expectations.
