Titel

## Kvalitetspolicy / Quality Policy Åstorp

För rutinen ansvarig Avdelning/Produktionsflöde

**VD / CEO**

Emballator Tectubes Sweden AB / Åstorp operations shall ensure the quality of the primary packaging and satisfied customers. Reliability and accuracy are of the utmost importance and we see active quality work as a natural part of all the companies processes. All activities within Emballator Tectubes Sweden AB / Åstorp aim to manufacture safe primary packaging with the right quality by:

- The quality system is contractually inspected for retained effect and opportunities for improvement
- We undertake to comply with legal requirements, standards, guidelines and customer requirements.
- The customer is always in focus through open communication
- Work closely with customers and suppliers to develop and improve our products
- Changes in primary packaging, processes and methods are investigated, risk assessed and sufficient measures are taken before the change is implemented and followed up.
- Internal and external deviations are reported, investigated and corrective measures are implemented and followed up.
- Manufacturing processes are validated.
- Manufacturing and quality controls of the primary packaging are performed according to established routines and instructions.
- All employees have documented competence and training.
- All employees in the company take full quality responsibility for their own operations.
